

# When it comes to pcv glass, just come to PSV Glass !

We are Europe's principal transport glass distributor and a specialist supplier of replacement safety glass to the Bus, Coach, Motorhome and Rail industries.

Established in 1988 and remaining independently owned and operated by the original management team, we deliver glass locally, regionally, nationally and internationally from three Distribution Centres in High Wycombe, Manchester and Glasgow, using a large fleet of specialist vehicles.

## Bus and coach glass deliveries.

We have made a very firm and long-term commitment to servicing the day-to-day needs of the Passenger Carrying Vehicle operator. Europe's largest transport glass stock, housed in over 1/4 million square feet of storage space is testimony to that.

We offer more early morning deliveries to more bus and coach operators than anyone in the business.

*“The decision 5 years ago to choose PSV Glass as ADL's exclusive glass distributor was absolutely the right one. Our customers say PSV Glass provides a consistently high level of service delivery and availability against the unpredictable nature of glass breakage. We are delighted with our ongoing partnership.”*

Rob Williams, Parts Director, Alexander Dennis Ltd.

## Train and tram glass.

We fit windscreens to all the UK's new high speed trains. This activity is so specialised that all our Glass Fitting Technicians are trained to exacting high standards and all hold Safety Critical work licences.

This gives us a wealth of knowledge and proficiency in the most complex of glass installations.

## Coach glass.

We stock a full range of glass and windscreens covering all coaches operating in the UK. We never compromise on quality that's why all our glass is quality assured and meets stringent EU standards.

In addition we offer a wealth of glass-related specialist knowledge and are committed to providing our customers with 100% support, 100% of the time.

It is very probable that any replacement glass in your coach was sourced or distributed by PSV Glass.

## Coach glass customers.

Although it is normal for us to deliver coach glass and windscreens to both Coach Operators and Specialist Glass Installation Companies, an increasing number of Coach Operators are now purchasing direct from us.

We now stock over 135,000 pieces of glass across a range of over 32,000 product lines.

*“Cost efficiency is an essential element in any coach operation, that's why we fit our own glass here at Park's and use the local facilities of PSV Glass to stock every piece of glass we are ever likely to need.”*

Malcolm Fisher, Fleet Engineer, Park's of Hamilton

## Coach glass deliveries.

Using sophisticated virtual GPS tracking on all our Service Delivery Vehicles (SDVs) gives us a clear visualisation of every journey route so an accurate ETA can be offered to all of our customers.

Several new, purpose-built extra height SDVs have now been added to our fleet, taking it to over 100.

24% of our coach glass deliveries are directly to Coach Operators.

*“Many of my customers run top spec fleets to the very highest of industry standards and demand glass fitting quality to be at factory finish levels and the replacement glass to the OEM specification - that's why I choose PSV Glass every time.”*

Richard Knight, Proprietor, Superscreens, London.

## Our commitment to coach glass customers.

A rapid response to your enquiry means we can guarantee you'll get the right glass part when you need it. Additionally, with our team of field based Service Engineers, you have the backing of technical support 24/7, local to you.
